Email: g.srujana2014@gmail.com
Mobile: +91-7386424290

SKILLS

- Languages:** C, C++, Python, SQL, HTML, CSS, JavaScript
- Technologies:** AI, Data Structures & Algorithms, Object-Oriented Programming, Arduino, IoT
- Databases/Tools:** MySQL, Git, GitHub, Figma, VS Code
- Soft Skills:** Problem solving, Team collaboration, Time management, Adaptability, Leadership

PROJECTS

Smart Trolley| C/C++, Arduino UNO, ESP32, RFID, IoT Mar2025 - Apr2026

- Developed a C/C++-based smart trolley application using Arduino IDE, integrating Arduino UNO and ESP32 with RFID, ultrasonic sensors, LCD display, and motor-control components to implement an automated shopping workflow.
- Implemented modular control logic, SPI-based RFID communication, sensor data processing, GPIO/PWM interfaces, and real-time event handling for item identification, obstacle detection, and trolley movement.
- Integrated and debugged 4+ hardware modules across 2 microcontrollers, applying embedded programming, modular software design, state-based control logic, and systematic debugging to deliver a functional IoT prototype.
- Tech Stack:** C/C++, Arduino IDE, Arduino UNO, ESP32, RFID (RC522), SPI, GPIO, PWM, Ultrasonic Sensor, LCD, L298N

Smart Bus Seat Monitoring System | C/C++, Arduino Nano, HX711, Load Cells, I2C LCD Apr2026-May2026

- Developed a C/C++-based real-time seat monitoring system using Arduino Nano, integrating dual load cells and HX711 amplifier modules to capture and process seat-pressure data for automated occupancy detection.
- Designed modular sensor-processing logic with configurable threshold-based decision making to classify seats as occupied or available, enabling reliable real-time monitoring of multiple seats.
- Implemented I2C-based LCD communication to dynamically display seat availability, integrating sensor inputs, data processing, and output handling within a resource-constrained embedded environment.
- Integrated and debugged 5+ hardware components across the embedded system, applying modular programming, sensor calibration, signal processing, GPIO/I2C interfaces, real-time event handling, and systematic hardware-software debugging to deliver a functional prototype.
- Tech Stack:** C/C++, Arduino IDE, Arduino UNO, ESP32, RFID (RC522), SPI, GPIO, PWM, Ultrasonic Sensor, LCD, L298N

TRAINING

Infosys Springboard | Certificate March 2026

Infosys Springboard | Introduction to Cyber Security Cyber Security Trainee

- Completed the Introduction to Cyber Security course through Infosys Springboard.
- Gained foundational knowledge of cybersecurity concepts, threats, vulnerabilities, and security practices.
- Learned about common cyber attacks, malware, phishing, social engineering, and online security risks.
- Developed an understanding of data protection, secure computing practices, and cybersecurity awareness.
- Built a strong foundation in cybersecurity concepts relevant to software development and AI/ML applications.

Skills: Cybersecurity Fundamentals • Threat Awareness • Network Security Basics • Data Protection • Phishing & Malware Awareness

CERTIFICATES

- Leadership Fundamentals| [EduTech Hub](#) Oct 2026
- Introduction to python| [Saylor.org](#) Feb 2026
- Times Critical Thinking Championship| [Times foundation](#) 2026
- Empowering Confidence: The Fearless Shift| [Lovely Professional University](#) Oct 2025-Dec 2025

ACHIEVEMENTS

- Participated in 8hrs Hackathon
- Completed 30 hours of community development volunteering through NGO activities.

EDUCATION

- Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 4.87** Aug 2025 - Present
- Ascent Junior College** Visakhapatnam, AP
Higher Secondary Education; **Percentage: 82%** Jun 2023 - Mar 2025
- Sri Chaitanya School** Visakhapatnam, AP
Secondary Education; **Percentage: 85%** Jun 2022 - Apr 2023
